

ROUNDUP 3 LITRE WEED KILLER SPRAY

KILLS THE ROOTS - SO WEEDS DON'T COME BACK - Jet or Foam

- Ideal for paths, Drives, Patios and Flower Beds
- Degrades in soil to allow replanting

3 Litres - Treats up to 90 m²

Fast Action ROUNDUP® - Ready to Use Weedkiller

Roundup XL Weedkiller is absorbed by leaves and moves through the entire plant, above and below ground, to destroy nettles, groundelder, brambles, bracken and other tough and woody weeds. It is inactivated on contact with the soil and is then broken down by soil micro-organisms, to allow replanting. **KEEP CHILDREN AND PETS OUT OF TREATED AREAS UNTIL DRY.**

INSTRUCTIONS FOR USE

How to use

Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear.

1. Clip band carefully.
 2. Pull out red connector.
 3. Insert red plug into spout on cap until it clicks. Squeeze cap as indicated and turn to open.
 4. Rotate nozzle to 'spray' or 'stream'.
 5. Prime by squeezing the trigger several times. Hold the sprayer approximately 50 cm away from the target weed and spray to lightly wet the weeds - avoid run-off.
- Rotate nozzle to 'OFF' after use and turn cap to closed position. Re-clip sprayer.

When to use

- Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray.
- Treat established perennial weeds at the start of flowering to give best results.
- Rain within 6 hours of spraying reduces effectiveness and repeat treatment may be necessary.
- Apply in calm conditions to avoid drift onto cultivated plants.

Where to use

- Controls most weeds around the garden, e.g. gravel areas, paths, drives, hard surfaces, patios, tarmac, along fences and for edging lawns.
- Can be used to clean up weedy ground before planting vegetables, flowers, bushes and trees and to renovate overgrown areas.

DO NOT USE ON LAWNS OR OTHER WANTED PLANTS, UNLESS YOU WANT TO KILL THEM.

- Treat established perennial weeds at the start of flowering to give best results.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.
- Weeds may show first effects from a few days up to 4 weeks, depending on the weather and the type of weed.
- Leave weeds 7 days before digging or soil cultivation, for the weedkiller to move to the roots.
- Repeat application if necessary, should new growth appear.

RESTRICTIONS

- **Avoid contact by spray and spray drift with cultivated plants and desired vegetation**
- **To avoid transfer to lawns and other desired vegetation do not walk into treated areas until the product has dried**
- **Do not re-use empty bottle**

Keep children and pets away from treated areas until spray has dried

This product is a home garden weedkiller for use on unwanted vegetation. It contains 7.2g/l glyphosate acid (present as 9.7g/l) IPA salt of glyphosate

PROTECT FROM FROST
